

FW21-22 COLLECTION

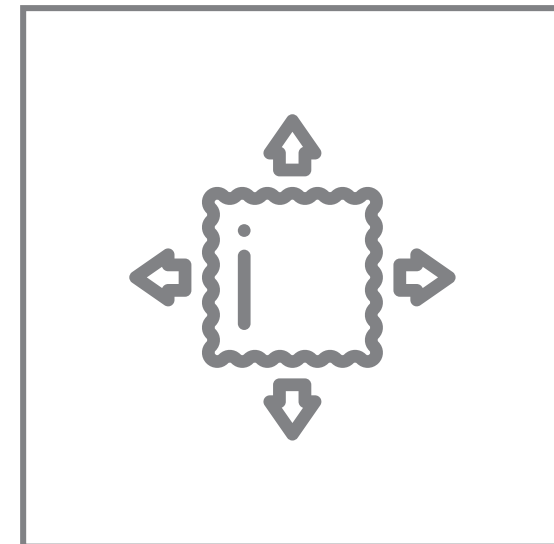

Major Highlights

Bio yarn

Our family of BioYarn fabrics consists of varying blends of natural fibres such as Hemp, Linen, Bamboo and Soy.

Flexy 3.0

Our latest iteration of hyper soft stretch fabrics, with low compression, perfect for that 'live in' jean.

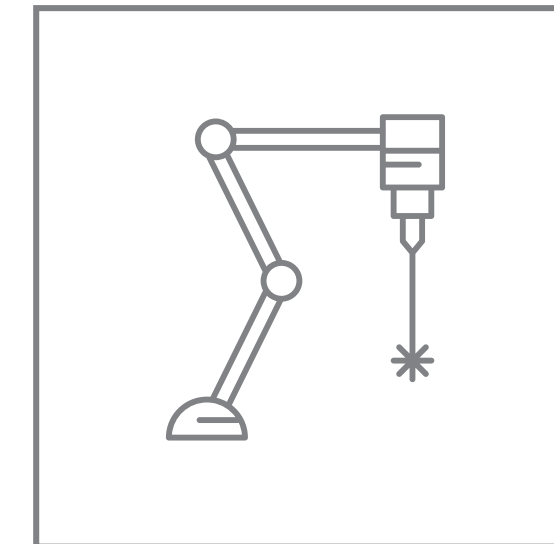

Anti-Microbial

Inhibits microbial growth in denim. Protects against unwanted bacteria that can lead to odor and discoloration.

Earthmatic (Cradle 2 Cradle)

Our family of Gold Cradle to Cradle certified fabrics made using Recycled Mill Waste - the only recycled C2C denim fabric in the industry. We have a range of fabrics in this category, from heavier weights to light chambrays, perfect for a Fall denim shirt or jeans.

Laser friendly shades

In line with our goal to offer products that have the lowest impact on the environment, we're gradually progressing towards offering all the industry's favorite shades in laser sensitive recipes.

Phoenix (Denim reborn)

From reborn fibres, our Phoenix family of fabrics is made from Recycled Mill Waste (RMW). Blended with other sustainable fibres for performance, aesthetics and hand-feel, these products are 100% free of virgin cotton. Coupled with sustainable dyes and finishing, it is one of our most circular offerings.
